SICILY IN A GLIMPSE

Sicily is a land of extremes and contrasts, a magnification of all things Italian. It is also an island of enormous intensity, a concentrated distillation of history, architecture and gastronomic delights, where incandescent volcanoes light up the night skies, mountain ranges jostle for supremacy, and where the sea has sculpted a coastline of stunning variety and beauty.

With its wonderful climate, Sicily is eminently welcoming all the year round and each season has its own distinctive charm. ¹

Catania is Sicily's second largest city, with a population of around 300,000. It lies on the Ionian Sea, under the shadow of Mount Etna, or "A Muntagna" as the locals refer to it.

Mount Etna is ever-present and has shaped both the history and the actual existence of Catania. On several occasions, volcanic eruptions destroyed the city, the most devastating of which happened in the 17th Century. In 1669, Catania was covered in lava and then, just 24 years later in 1693 an earthquake shook the town down to its foundations. The reaction to this latter catastrophe was amazing: the entire old part of town was rebuilt in Baroque style, with large squares and avenues. The most remarkable aspect, however, was the material used to reconstruct the buildings: lava! Catania is essentially a "grey" city and unique in the world for this².
